CDLS 1

Food Lube High Performance Grease, NSF H1

Description

CLDS 1 a non-toxic high quality grease on the basis of pure medicinal oil. The product contains extra solid lubricants for optimal lubrication.

CLDS 1 thereby cuts down on the problems of friction and noise without the disadvantage of chemical additives. Due to the excellent adhesion of this product, it is not easily washed out by water or steam. This product may be used in the food industry.

Application

Can be applied in all situations requiring an excellent durable lubrication with anti-seize properties. Suitable for use in the food industry, in virtually any environment (also in the case of high peripheral speed), open and closed systems:

- drive systems
- damp environments
- all types of conductors, cables, rods
- chains.

Advantages:

- Ideal for the food industry
- (Salt) water and steam resistant
- Easy to spread
- Durable
- corrosion-resistant
- conserving effect
- water resistant

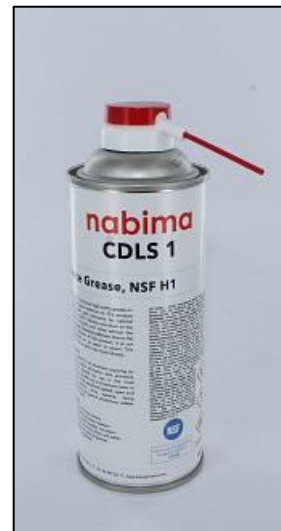

- anti-seize properties.
- NSF H1 regisdred

Technical Data:

Color	White transparent
Composition	Medical base oil, lubrication particles Additive packages
Density	0.9 kg/l
Viscosity	NLGI 1-2
Thermal stability	Very stable
Thermal range	-20°C - + 170°C

Ordner nubers CDLS 1:

- U-50.32155** 400 g cartridges
U-50.32150 in 400 ml spray – aerosol
